La Memo è un servizio pubblico per l'intera comunità. Collabora al buon funzionamento seguendo alcuni semplici comportamenti.

- Iscriviti alla Memo per accedere a tutti i servizi
- Rivolgiti ai bibliotecari per qualsiasi informazione
- Tratta con cura i materiali
- Riponi i documenti consultati nei carrelli
- Utilizza la macchina dell'autoprestito
- Rispetta i tempi di riconsegna
- Usa il telefono cellulare in modalità silenziosa
- Partecipa alle iniziative della Memo
- Invita gli amici a frequentare la Memo
- Dai suggerimenti per migliorare il servizio

Memo is a public service for the whole community. Please contribute to its smooth functioning by observing a few simple behaviours.

- Become a member of Memo to gain full access to our services
- Ask the librarian for information and help with your research
- Handle all material with care
- Return all consulted documents to the trolleys
- Use the self check machine
- Observe the return dates on borrowed materials
- Switch off the sound on your mobile phone
- Take part in all Memo initiatives
- Invite your friends to attend Memo
- Let us have your suggestions on how to improve our service

Ama La forza della semplicità

Composto da un elemento montante pavimento-soffitto o autoportante ed una vasta gamma di accessori, Ama è facilmente adattabile ad ogni esigenza di Visual Merchandising, grazie alla sua ricombinazione.

L'elemento di giunzione, denominato "mano", è costituito da un attacco magnetico che può essere posizionato in qualunque punto del montante con un semplice meccanismo di "clicc-clacc" e senza l'aggiunta di viti o altri meccanismi di fissaggio.

Ama è un sistema stander adatto a carichi pesanti e leggeri e che si adatta ad ogni merceologia. Il progettista può dar sfogo alla sua creatività ricombinando in modo diverso i colori dei vari elementi che la compongono.

Ama The power of simplicity

Constituted by a floor-ceiling or self-standing upright and a large range of accessories, Ama is easily adaptable to every visual merchandising need on the ground of its recombination feature.

The linking joint is called "hand" and is based on a magnetic block that can be positioned anywhere on the upright with a simple "click-clack", without need of screws or other fixing elements.

Ama is a display system suitable for heavy or light loads and to every product to display. The designer can unleash his creativity also by re-combining in various ways the colours of the elements that compose Ama.

 "Pasta di semola di grano duro con olio extravergine di oliva"
COSA HA DI DIVERSO LA NOSTRA PASTA??
 A TUTELA DELLA SALUTE TUA E DEI TUOI FIGLI
 Realizzata con semola di grano duro duro, con
 un'acqua dolce e pulita e con i migliori oli extravergine di oliva,
 solo pasta di semola di grano duro.
PER UNA MIGLIORE QUALITÀ
 Trattata e seccata con tecniche tradizionali e precise
 a 130°C in singoli stadi, con un'aria pulita e controllata.
 Pasta di semola di grano duro, con un'acqua dolce e pulita,
 solo pasta di semola di grano duro.

TERRA
pasta & vino biologica

San Giovese

Cuili Pezzani

È un vitigno molto diffuso in tutta la penisola italiana, in particolare nel sud, dove è coltivato da secoli. È un vitigno molto versatile, che può essere coltivato in diverse varietà di uva, da quelle a bacca nera a quelle a bacca bianca. È un vitigno molto resistente alle malattie e ai parassiti, che non necessita di particolari trattamenti. È un vitigno molto produttivo, che può essere coltivato in diverse varietà di uva, da quelle a bacca nera a quelle a bacca bianca. È un vitigno molto versatile, che può essere coltivato in diverse varietà di uva, da quelle a bacca nera a quelle a bacca bianca. È un vitigno molto resistente alle malattie e ai parassiti, che non necessita di particolari trattamenti. San Giovese
Cult. Primitivo

Il San Giovese è un vitigno autoctono della zona di San Giovese in Puglia. È caratterizzato da uva a grappoli compatti e di colore scuro. Il vino ottenuto è rosso, con aromi di frutta secca e spezie.

MIRCO TARSÌ, MATTIA
VERNOCCI
**LA CIVILIZZAZIONE.
PRIMOLO. CIO' CHE
FINITO E' CIO' CHE
COMINCIA E' UGUALE.**

Il primo libro della collana "Primo-
lo" è dedicato a questo. Il
tema è la storia della civiltà
e della cultura. Per il primo
volume della collana, ecco il
titolo: "Primo-Lo. Cio' che
finito e' cio' che comincia e' uguale".
Il libro è scritto da Mirco Tarsì
e Mattia Vernocchi. Il libro
è diviso in due parti. La prima
parte è dedicata alla storia della
civiltà e della cultura. La seconda
parte è dedicata alla storia della
lingua e della letteratura.

Il libro è scritto da Mirco Tarsì
e Mattia Vernocchi. Il libro
è diviso in due parti. La prima
parte è dedicata alla storia della
civiltà e della cultura. La seconda
parte è dedicata alla storia della
lingua e della letteratura.

LA QUALITÀ

La produzione di complementi e tecnologie per l'arredo fa parte della nostra storia. Anni di esperienza e competenza ed una stretta collaborazione con il Gruppo Gibam contribuiscono al successo di Cean Company. Lavoriamo a stretto contatto con pochi fornitori che credono anch'essi nello sviluppo della qualità. In questo modo controlliamo l'intero processo di produzione garantendo gli standard massimi in ogni fase.

Prendiamo sul serio la qualità dei nostri prodotti e servizi e pensiamo che questa non si ottenga casualmente ma con un lavoro costante e mirato.

Un controllo della qualità completo basato sullo standard ISO 9001 e una grande attenzione nella produzione sono stati attivati con tutti i nostri fornitori. Questo assicura che tutte le nostre direttive vengano seguite durante il processo di produzione garantendo che i prodotti finali vengano controllati prima di lasciare lo stabilimento.

Tutti i nostri sistemi sono realizzati con componenti di alta qualità e si basano sul nostro appassionato rispetto per il design funzionale ed economicamente accessibile. Per ottenere tutto ciò, ci impegniamo a trovare il giusto equilibrio tra materiali attentamente selezionati, design gradevoli e una studiata semplicità. Di seguito vengono indicati ulteriori dettagli sui materiali utilizzati per i nostri arredi.

QUALITY

The production of complements and technologies for furniture systems is part of our history. Years of experience and competence and a fruitful cooperation within Gibam Group have contributed to the success of Cean Company. We work in close cooperation with a handful of suppliers that also believe, as we do, in the continue improvement of quality. In this way we control the entire production process and guarantee high standards in every phase.

We take seriously the quality of our products and services and believe that quality is a goal that can be achieved through a constant and focused work.

A complete quality control based on ISO 9001 standard and a great attention to the production are applied to all our suppliers. Such organization guarantees that our policies are followed all along the production process, up to a final control before the products leave the factory.

All our system are produced by using high quality materials and are developed on the ground of a passionate respect for an economically feasible and functional design. We are every day committed to find the right balance between carefully selected materials, pleasant design and a planned simplicity. Below you will find more details about the materials we use.

Mobili in legno -

Sono presenti numerose superfici in legno nei nostri arredi. Il legno essendo un materiale naturale ha una sua caratteristica intrinseca relativa alla presenza di striature. Le nostre superfici sono testate per garantire la resistenza ai graffi e ai liquidi, e la solidità dei colori, anche in contesti ad alto traffico come le superfici commerciali.

Verniciature con polveri termoindurenti -

La verniciatura con polvere poliestere atossica termoindurente viene applicata mediante l'utilizzo di pistole elettrostatiche e cotta a 200°C in forno di polimerizzazione. Le altre parti in metallo sono rivestite da pittura di elevata qualità, fornendo una superficie resistente. La verniciatura è un trattamento superficiale ecologico che non contiene solventi e metalli pesanti.

Vetro -

Gran parte dei ripiani dei tavoli sono in vetro trasparente, acidato e laccato. Su richiesta è possibile scegliere il vetro temperato qualora sia preferito. Tutti gli spigoli sono rifiniti secondo standard elevati.

Parti metalliche -

Gran parte delle nostre parti metalliche sono realizzate con materiali di altissima qualità, così da eliminare quasi del tutto le impurità. Le parti metalliche vengono trattate in modo da semplificare la lavorazione e da lasciare una superficie liscia a minimo rischio di ossidazione. Le altre parti in metallo sono rivestite da vernici di elevata qualità, fornendo una superficie resistente. La colorazione avviene mediante un trattamento superficiale ecologico che non contiene solventi.

Componenti in legno compresso nobilitato con carte melaminiche -

Le parti in legno sono costituite da pannelli di legno truciolare le cui facce sono rivestite da più strati di fogli di carta impregnata con resine termoindurenti, ricoperto da un foglio di carta decorativa e uno strato di resina melaminica che conferisce sia l'effetto estetico che l'impermeabilità.

Wooden furniture -

Our furniture features many wooden surfaces. Being wood a natural material, it shows veins and patterns. Our surfaces are tested to be scratch-resistant and waterproof, and are guaranteed against the fading of colours even in environments with high presence of people as commercial areas..

Coating with thermosetting coatings -

The coating with non-toxic polyester thermosetting powder coatings is conducted by using electro-static guns and treated in polymerization kilns at 200°C. Other metal parts are coated with high quality paints, and insure a resistant surface. Our coating processes are ecologically made and guaranteed to be solvent-free and heavy-metal free.

Glass -

Most of the table tops are in glass, either transparent, frosted or lacquered. It is possible to require tempered glass. All corners are cut by respecting safety standards.

Metal parts -

Most of our metal products are made by using very high quality raw materials, so to eliminate most of the impurities. Surface treatments are aimed at giving a smooth result and guarantee low risk of oxydation. Other metal parts are coated with high quality paints, and insure a resistant surface. The coating is made through an ecological solvent-free treatment.

Melamin coated particle board -

Wooden parts are constituted by panels of particle board whose surfaces are coated with many layers of paper soaked with thermosetting resins, covered by one layer of decorative paper and by a final layer of melamin resin which confers aesthetic and water-proofing properties.

L'AMBIENTE

Il nostro impegno per i temi della sostenibilità, dell'etica, rispetto per le persone e per l'ambiente, fanno da cornice alla nostra visione strategica, al nostro costante investimento nell'innovazione di prodotti, processi e tecniche produttive. L'attenzione e la cura nella scelta dei materiali è una costante aziendale. Cerchiamo quotidianamente di limitare gli sprechi e favorire il riuso/riciclo dei materiali. Gli elementi realizzati mediante l'utilizzo di legname e vetro vengono reperiti a livello locale per ridurre le distanze di trasporto, permettendo una diminuzione dell'inquinamento e dei costi di trasporto. Da marzo 2011 tutti gli articoli di illuminazione a bordo dei nostri prodotti utilizzano solo tecnologie LED, a basso consumo energetico e massimo ciclo di vita. Da giugno 2011 tutti gli stabilimenti sono dotati di impianti fotovoltaici per la produzione dell'energia elettrica. Da gennaio 2012 abbiamo bandito l'utilizzo dei metalli pesanti nella realizzazione delle finiture di superficie dei nostri arredi o componenti di arredo. I materiali che utilizziamo per i nostri arredi, legno, vetro e vernici, sono scelti e selezionati con estrema attenzione privilegiando elementi ecosostenibili e poco inquinanti. Lavoriamo con determinazione, qualità e concretezza.

ENVIRONMENT

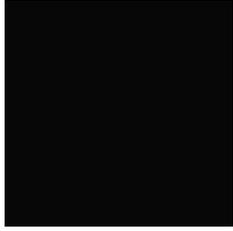

Our commitment for issues like sustainability, work ethics, respect for people and environment, are at the ground of our strategical vision and of our constant investment aimed at innovating products, processes and production techniques. The attention and care paid to raw materials selection is a constant practice of our company. Every day we strive to reduce materials wastage and promote the reuse and recycle. Raw materials made of wood or glass are sourced locally, trying in this way to reduce transport costs and the related pollution. Starting from March 2011 all lighting products which we provide integrated in our furniture systems employ LED technology, characterised by low energy consumption and long life cycle. Starting from June 2011 our factories can boast state of the art photovoltaic roofs for the production of electricity. From January 2012 we have got rid of heavy metals in all the finishes of our products. The materials we use for the production of our furniture, either wood, glass or coatings, are selected and chosen with great care by giving priority to those eco-sustainable and less polluting. We work with determination, quality and concreteness.

MATERIALI & COLORI

La modularità e la flessibilità dei prodotti Cean Company vi danno piena libertà di esprimervi. Offriamo per ciascuna linea di prodotti una gamma di materiali, design e colori ben definita. Aggiorniamo la nostra "palette colori" ogni anno, per garantire ai nostri interlocutori sempre le finiture di maggiore tendenza. Ecco una panoramica di tutti i nostri colori e superfici. Le vernici che utilizziamo vengono scelte in base a standard qualitativi elevati e in relazione alla loro ecosostenibilità. Ci avvaliamo di colorazioni a base d'acqua con un basso impatto ambientale. Le finiture speciali vengono gestite direttamente con l'interessato su richiesta.

MATERIALS AND COLOURS

The modularity and flexibility of Cean Company products give you great freedom of expression. For every product line we offer a range of materials, design solutions and colours. Our colour palette is refreshed every year, thus giving the opportunity to use the last trends in finishes. This is a glance over all our colours a surface finishes. The coatings we use are chosen on the ground of high quality standards, with particular attention to their eco-sustainability. We use water-based coatings with low environmental impact. Special finished are decided with the client by request.

L'AZIENDA E LE PERSONE

Cean Company nasce a Fano nel 1994 come azienda artigianale specializzata nella produzione di tecnologie per l'arredo negozi. Grazie al know-how e alla qualificata esperienza del Gruppo Gibam, di cui entra a far parte, Cean Company sviluppa un crescendo di iniziative che dimostrano come l'azienda abbia saputo adeguarsi, con forte capacità di innovazione, ai mutevoli cambiamenti del mercato, dimostrando una qualificata esperienza tecnica. Nei primi anni di vita si specializza nella realizzazione di vetrine espositive e complementi espositivi in vetro, e sin dal 2004 inizia a sviluppare componenti e tecnologie di arredo a supporto degli arredatori di negozi e locali pubblici anche in metallo, zama, alluminio e plexiglas, tecnologie sempre più sofisticate e qualificate dettando nuovi standard di riferimento ed offrendo prodotti caratterizzati dalla cura per i dettagli, qualità, sicurezza e rispetto ambientale. Oggi, dopo anni di esperienza e costanti innovazioni, Cean Company, è una delle aziende più qualificate del settore e decide di aprirsi anche al mondo della casa in risposta alla tendenza di fusione tra il mondo domestico e quello commerciale che si sta verificando negli ultimi anni.

COMPANY AND PEOPLE

Cean Company was established in Fano, Italy, in 1994 as an artisanship activity specialised in the production of technologies for the furnishing of shops and stores. Thanks to the know-how and to the qualified experience of Gibam Group, to which belongs, Cean Company developed a flourishing flow of ideas that shows how the company has been able to adapt to the changes in the market. This development has been characterised by a strong innovative capacity based on a significant technical knowledge. During the first years of its life Cean specializes in the creation of glass display cabinets, and since 2004 starts to develop furnishing components and technologies as a support to shop and commercial areas contractors, enlarging its product range to products made in aluminium alloy, zinc alloy, acrylics. This new development is also done by employing sophisticated technologies thus setting new standards in the market, and by offering products characterised by care for details, quality, safety and environmental protection. Today, after years of experience and constant innovation, Cean Company is one of the most qualified companies in its sector; and is looking at the home sector as an answer to the trend of merging between home and commercial worlds that these last years show.

NICOLA DE PELLEGRINI ARCHITETTO

Nicola De Pellegini nasce ad Agordo (BL) nel 1976 e si laurea in architettura all'Istituto Universitario di Venezia (IuAv) nel 2003. Dal 2003 al 2008 si occupa di progettazioni di interventi di edilizia residenziale, edilizia pubblica, di infrastrutture e pianificazione urbana. Nel 2011 fonda Anidride\design, società unipersonale nata per offrire un servizio completo per i suoi partner industriali nei settori del valore aggiunto, del disegno di prodotto e del retail design. Il suo metodo di lavoro si basa sul rapporto tra la creatività e l'attività commerciale.

I suoi lavori principali sono visibili sul sito www.anidridedesign.com

NICOLA DE PELLEGRINI ARCHITECT

Nicola De Pellegini born Agordo (BL) in 1976 and graduated in architecture at the University Institute of Venice (IUAV) in 2003. From 2003 to 2008 deals with the design of residential building projects, public housing, infrastructure and urban planning. In 2011 he founded Anidride\design, single-member company created to offer a complete service to its partners in the fields of industrial value added, the product design and retail design. His working method is based on the relationship between creativity and business.

His main works are visible on the site www.anidridedesign.com

I SERVIZI E-COMMERCE

Cean Company è **la prima azienda del settore dell'arredo commerciale in Italia che dispone di un'area riservata all'e-commerce per progettisti e rivenditori**. Ordinare tramite internet è comodo, veloce, conveniente, pratico, semplice e sicuro. Il nostro cliente potrà effettuare il suo ordine quando più preferisce, avvalendosi della possibilità di accedere all'area riservata tutti i giorni e in tutte le ore del giorno. Mediante un sistema facile ed intuitivo, potrà scegliere la merce che desidera e in pochi e semplici step, effettuando un ordine con la massima precisione, riducendo al minimo i tempi di attesa e la perdita di tempo per le pratiche burocratiche che tradizionalmente occorrerebbero. Per i progettisti che conoscono già il mondo Cean Company acquistare on-line è semplice, pratico e veloce, mentre tutti coloro che si avvicinano per la prima volta al servizio e-commerce potranno richiedere l'assistenza di un nostro operatore sempre attivo su skype durante il processo di acquisto. Grazie ai prezzi vantaggiosi che Cean Company riesce ad applicare, dovuti all'eliminazione delle tradizionali fasi di intermediazione, il nostro rivenditore avrà un trattamento riservato e più conveniente. I tempi di consegna sono ridotti e Cean Company gestisce in modo puntuale tutti di ordini a partire da quattro giorni lavorativi. La cortesia è di casa in Cean Company, i commessi virtuali trattano con dovuta premura i propri clienti rispondendo tempestivamente ad ogni loro richiesta. Entra anche tu in Cean Company e prova il servizio e-commerce!

E-COMMERCE SERVICES

Cean Company is the first company in the Italian sector of commercial furnishing that offers a reserved area for e-commerce dedicated to retail designers and distributors. To order by internet is convenient, quick, comfortable, easy and safe. Our client will place his order in any moment, because the reserved area is accessible every day for 24 hours. By using a simple and intuitive system the client can choose the articles he wants and place a precise order; cutting to a minimum the time required and the procedures to follow when compared to a traditional ordering method. For all those who already know the Cean world on-line purchase will be simple, practical and fast, while new users will have the real-time support of an operator through Skype. Thanks to the convenient prices that Cean can offer, having eliminated many intermediate steps of relationship, our distributor will enjoy a reserved and more convenient treatment. Delivery time is reduced and Cean Company guarantees punctually all orders starting from 4 working days. Courtesy is at home with Cean Company: virtual salespeople act with care with the customers and answer quickly to every request. Get in touch with Cean Company and try the e-commerce service!
